PROFESSIONAL EXPERIENCE

Flutter Developer at Code-mint

Jul 2022 – June 2025

- Led a team in developing scalable mobile applications.
- Built APIs from scratch using NestJS Backend Framework.
- Mentored Junior Flutter Developers. Provided hands-on training and guidance to junior developers in Flutter development, covering best practices, architecture patterns, state management, and real-world project implementation. Helped accelerate their learning curve and improve code quality and team productivity.

Projects

- Teemee: Social networking app for users and businesses with social feeds, promotions, loyalty rewards, group chat, deep linking, and subscription features. ([IOS](#))
- Eatzo: Dual food delivery app (Customer & Restaurant Owner) with real-time orders, menu management, OTP login, cart system, and maps-based address selection.
- Eve: Women-focused social media and e-commerce platform with posts, reels, chat, online store, role-based access, appointments, and maps integration.
- Dr-Uber: On-demand doctor booking app with live location tracking, Socket.IO real-time events, chat, and rating system.
- Tabibak: Healthcare platform featuring multimedia chat, doctor services, and user profile management for remote consultations.
- Git3com: Social marketplace for car parts with product uploads, reviews, and interactive post features.
- Shifacom: Medical records and consultation app with dynamic data handling and structured patient information management.
- Just Smile: Educational dental app developed with Jordan University of Science and Technology to promote dental awareness.
- Mafia Game: Multiplayer digital card game with real-time interaction and role-based gameplay mechanics.

- Speed 4 Speed: 2D racing game built using Python and Pygame with custom physics and collision handling. [\(link\)](#)
- Delivery Time: Early-stage food delivery app with Firebase integration, push notifications, and real-time order updates.
- Irbid City: Tourism app showcasing attractions and navigation, awarded 1st place at the 2022 Jordanian Hackathon.
- Yelp Camp: Full-stack web app (Node.js, Express, MongoDB) with authentication, CRUD operations, and RESTful APIs. [\(link\)](#)

TECHNICAL SKILLS

Programming Languages: Dart, JavaScript, TypeScript, Python, C++

Frameworks/Libraries: Flutter, NestJS, NodeJS, Express

Databases: MongoDB, Firebase, MySQL, Redis

DevOps Tools: Fastlane, Github Actions, CI/CD Pipelines

Other Skills: SOLID Principles, Clean Code, RESTful APIs, OOP, Data Structures

Soft Skills: Leadership, Collaboration, Client Communication

EDUCATION

Bachelor of Computer Science, Jordan University of Science And Technology

COMPETITIONS / CERTIFICATIONS

Securing the 1st place for the Best Mobile Application among all Jordanian universities was a remarkable achievement, celebrated at the prestigious Irbid ceremony—an event held in honor of Irbid being recognized as the Arab capital of culture for the year 2022. Other Competitions: Participated in many CTF competitions such as JUST CTF 2023, PSUT CTF 2022, JUST CTF 2021.
